imports by almost \$20,000,000, which was within \$3,000,000 of our advantage during the same months of 1878. For the months of the carrent fiscal year we have an excess of imports of \$175,585, 357, as compared with an excess of \$135, 699,528 for the seven months ended Janu ary 31, 1878. So, apart from the actua decrease in the volume of trade, the prospect for the current year is favorable. The activity in business circles is increasing gradually, and commercial confidence

gradually, and commercial confidence is being restored in a most gratifying degree, as the people are settling down to the principle of small profits and quick sales and a system of simple and safe mercantile credits for the encouragement of traffic.

State's highest are still badiy troubling the Southern people, and, in order to maintain their position on them, they appear willing to invite disease and death. On Saturday in Congress the Southern Democrats killed the bill providing a United States board of health, because it involved a national quarantine, and would thus interfere with the quarantine regulations of certain States. This vote in effect declares that the South would prefer another yellow fever epidemic, which the defeated bill was intended to prevent to any interference by Federal authority with local health boards and officers. Of course, it is the sane and C. W. Newlon be appointed and selected on the part of the Senate and in answer to House John Resolution No. 30.

Of course, it can never be expected that the really high toned Southern gentleman will ever abandon his support of State's rights; but it does don his support of State's rights; but it does look as if he were disposed to pay a rather high price for the privilege of supporting them. The yellow fever proved only a few months ago, that it was not a pleasan thing to encourage, and even a real Southern gentleman visiting New Orleans during July, August or September, might impressed with the idea that Federal interference, with its destructive march, might be tolerated, but the South, or at least that part of it represented in Congress, is always consistent. It will ne even pestilence and death rather than yield a local health board or a State quarantine officer to the nation. While, so far as it concerns itself, the South should be permitted to do as it pleases, it is that the whole country shall be exposed to the danger of the yellow fever scourge only that it may maintain its State's rights

### THE PENNSYLVANIA RAILROAD.

The Annual Report of the Company Shows a Surplus Considerably Less Than that Heretofore Reported. PHILADELPHIA, March 3.-The North

BILLS PASSED.

The following bills were passed:
House Bill No. 210, to protect the purchasers of fertilizers in the State.
House Bill No. 1, to establish a County Court and Board of Commissioners for the county of Pendleton.
House Bill No. 11, to establish a Municipal Court in the city of Huntington.
House Bill No. 144, to punish persons found violating the license laws of the State along certain rivers.
Senate bill No. 177, a bill prescribing regulations for the transportation of petroleum or other oils or liquids through pipes of iron or other material constructed for that purpose.
House bill No. 28, to establish a County Court for the county of Preston.
House bill No. 243, changing and fixing the time for holding the Circuit Courts in the Fourth Judicial Circuit.
House bill No. 244, changing and fixing the time for holding the County Court in the county of Hampshire.
House bill No. 255, providing for the holding of the County Court of the county of Pleasants.
House bill No. 200, in relation to elections.
Dr. Logan, chairman of the Committee Net earnings... 12,088,678 13,167,711 1,079,062 A large part of this gain is due to the in-

A large part of this gain is due to the increased receipts from the New Jersey railroads, which show a deficit in meeting fixed charges of nearly \$400,000 less than for 1877. The surplus after meeting all liabilities will be a little less than four millions, of which three millions have been applied to paying off the floating debt of the Pennsylvania Company, and the balance to a two per cent dividend and to reducing the floating debt of the railroad company, which was less than a million at the close of the year. By this time half of that has been paid off, and it is probable that by the day of the meeting there will be hardly a quarter of a million standing against the company. The floating debt has been a very light burden, for the company has found no difficulty of late in borrowing at 4 per cent.

Dr. Logan, chairman of the Committee on Calendar, reported the order of business for the House, and recommended that the appropriation bill be made the special order of business for Wednesday pany has toung as a rowing at 4 per cent.

rowing at 4 per cent.

By this statement the company shows a gain in net earnings over the previous year of \$1,079,062. The report last year claimed a surplus of \$1,582,410, out or which was paid two dividends of 2 and 11 per cent respectively, amounting to \$2,586, of 706. Now with a gain of the amount mentioned above as net earnings it is claimed that the company will show a surplus of less than \$4,000,000, out of which a 2 per cent dividend has to be deducted, and also the \$50,000 per mouth to apply to the funding scheme. These figures are

plus of less than \$4,000,000, out of which a 2 per cent dividend has to be deducted, and also the \$50,000 per month to apply to the funding scheme. These figures are rather puzzling, and it is difficult to reconcile the two statements. The report as figured in the statements forthcoming, is certainly very far short of the statements given out for some time past, that the report would show a surplus of \$5,000,000 after paying the dividend, and which statements were made by persons who claimed to have had the figures from the offices of the company. It has been a great disappointment to the friends of the road, and will be likely to result in lower prices for the stock,
